

General Risks

1. **No leader** : makes the work unorganized, and will lead to unsatisfied result
2. Unprepared written plan : this leads the members to forget important information, which will lead to lose time and profit
3. **Unknown deadline date**: if there is no deadline the process of the project may take endless time or may be afterwhile will be ignored or canceled.
4. **Bad communication and cooperating between members**: it will leads to many misunderstanding which gonna lead to many errors or sometimes some members may leave the team project
5. **A members quit the project suddenly** : the other group members will be confused because they will need to make a new plan and strategy which gonna cost time and money
6. **Misunderstanding the customer request**:

this leads to lose time and profit also the customer will be unpleasant with the work which gonna make the team lose their reputation too. Therefore there will not be customer on the future

7. **Assigning a member to a wrong position:**
for example: assigning a member to code who is not very well at coding to code the project whereas this member is very good at written the requirements and analysis of the project
8. **Lazy team members :** will lead to delay the project and the project will deliver to the customer at the time.
9. **Shortage of materyal or lack of money:**
wich gonna make the team refuse the project or deliver it late.
